## Description

The PAD100-LEDK provides a mappable key-switch input making it ideal for key control of a variety of system functions. The PAD100LEDK provides mappable red LED which can be used to indicate a variety of status conditions.

## Application

The PAD100-LEDK is compatible with Potter's IPA and AFC/ARC series addressable fire alarm control panels. It installs on a single gang box.

## Setting the Address

The PAD100-LEDK uses one SLC address assigned to the device. The address is set using the DIP switch located on the back of the PAD100LEDK device.

Before connecting a device to the SLC loop, take the following precautions to prevent potential damage to the panel or device:

1. Power to the device is removed.
2. Field wiring is correctly installed.
3. Field wiring has no open or short circuits.
