- 32 Character LCD Display
- Power On LED
- Backlit key pad
- Passcode protection or key operated
- Simplistic wiring connections
- User menu
- Zone messages

Stock number: 3003007

Description

The RA-7630 LCD Annunicator offers a 32-character full text LCD readout that displays system events and menu prompts, making it efficient and easy-to-use. The backbox and trim frame provide an attractive installation. The keypad can either be flush-mounted or surface-mounted. The RA-7630 Fire Command Center has a factory installed keyswitch that enables the four function buttons—Alarm Silence, System Reset, System Test, and Fire Drill. The user can also access these four functions and many more through the User Menu by entering a valid user code. An internal diagnostics program lets installers and service technicians test the operation of the keypad at any time without disabling the system.

RA-7692

- 5 Red Alarm LED's
- 5 Amber Trouble LED's
- Mounts on door of cabinet or remotely
- Simplistic wiring connections
- Internal buzzer
- Trouble LED for Communication failure or Phone line problem.

Stock number: 3003002

Description

The RA-7692 keypad annunciator provides LED notification of the system status for the PFC-7500 series communicators. The panel has five sets of LEDs to indicate alarm and trouble conditions. In addition, the panel has a Power ON LED and a Trouble LED that will indicate a communication and phone line failure. There is a piezo sounder that will activate momentarily anytime a key is pressed, sounds intermittently during a trouble condition and sounds steady when an alarm condition is present.

The keypad is powered directly from the PFC-7500 series panel. The keypad has a wire harness that readily connects to the panel. The keypad efficiently operates on 30mA and up to 500mA worth of the RA-7692 can be connected to a single panel. The keypad has a removable back for ease in mounting.
