St. Louis, MO – Potter is pleased to announce that Underwriters Laboratory (UL) recently verified the compatibility between Potter's new VSA-2 Series Vault Sound Alarm and the original VSA microphones. (PSM, PSM-F, PSM-T, PSM-FT)

The approved compatibility provides installers a means to upgrade existing Vault Sound Alarm (VSA) installations without replacing the entire system. The first-in-line microphone (PSM-T, PSM-FT) can be replaced by the VSA-1 controller/microphone. The other existing PSM series microphones will attach directly to the VSA-1 controller to complete a new complete functioning system.

Additional information can be obtained by contacting Scott Holman by phone at 800-325-3936 or via e-mail at sales@pottersignal.com.
