This precision ULC Listed Sprinkler Switch is designed as a waterflow alarm switch to sound Local or Central Station alarms to indicate water is flowing from a sprinkler head on wet or dry systems. Designed to be connected to the alarm port and operate on pressure increase.
MECHANICAL MOUNTING

1. Mount in any position via 1/2" NPT male fitting (wrench tighten).
2. Seal threads with teflon tape to seal properly.
3. Install conduit and conduit connectors using 7/8" diameter hole (for 1/2" conduit).
4. Test fitting for leakage under maximum operating pressure, to the standard of the authority having jurisdiction.

ELECTRICAL CONNECTIONS

ELECTRICAL RATING:
- 250VAC 15A 1/4 HP
- 125VAC 15A 1/8 HP
- 250VDC 0.2A
- 125VDC 0.4A
- 30VDC 2A

Suitable for connection to CLASS A or CLASS B circuits, NO or NC configuration.

TAMPER SWITCH ELECTRICAL CONNECTION

TESTING:
Test function of switch to the standard of the authority having jurisdiction.
