The HUSK-20 is a mechanical hold-up switch designed for silent operation. It is activated by using one finger to press down on the switch. When activated, the switch mechanism locks, insuring an immediate alarm signal. A status window designed on top of the hold-up switch indicates its condition: RED (alarmed) and BLUE (armed). To reset the HUSK-20, use the key provided. The housing is made of metal and is painted gray.

The hold-up switch sends a signal to a dedicated 24 hour hold-up circuit of a burglar control panel. That signal in turn will send the immediate signal to police or central station.

**Typical Wiring**

- **N.C.**: Normally Close
- **N.O.**: Normally Open
- **E.O.L.R**: End Of Line Resistor
- **COM.**: Common

**Dimensions**

- Height: 3.66 (92.96 mm)
- Width: 2.125 (53.97 mm)
- Depth: 1.19 (30.22 mm)
