

ABB-1014 OUTDOOR SLIMLINE STEEL BELL BOX

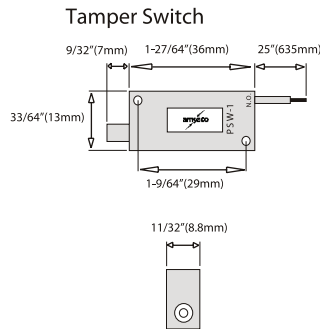

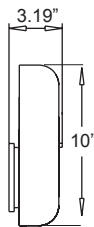

- 18 gauge cold rolled steel
- UL Listed motor driven low current bell (100mA at 12V DC)
- Dual-wired, UL Listed reed tamper switches
- Salt spray and rust resistance
- 12V DC operating voltage
- Durable, weather-resistant powder coat paint
- Suitable for use with most control panels
- Evenly spaced louvers for a higher sound output
- Overall size 14" x 14" x 4"
- Exterior color is almond

Stock number - 4010003

The ABB-1014 is a rugged outdoor slim-line bell box, designed to withstand harsh environment conditions. The box is constructed of a heavy interlocking welded 18 gauge steel with a durable almond powder coat finish to prevent corrosion. It operates on 12V DC and draws a low 100mA. The ABB-1014 implements an exclusive UL Listed, low current, patented motor driven bell mounted to a removable inner baffle plate and generates a sound output of 100 plus decibels. Two UL approved reed tamper switches are designed into the bell box to provide complete tamper protection.

Dimensions: inches (mm)

Specifications

Model Number	Rated Voltage	Rated Current	Sound Output	Starting Voltage	Bell Gong Size	Tamper Switching Current	Tamper Switch Carrying Current	Total Weight (lbs.)
