

EVAX Series Conventional Voice Systems

Standalone voice evacuation,
built for today's installers.

Potter's new EVAX Series Conventional Voice Systems deliver standalone voice evacuation in three cost-effective models, with text-to-speech, field programming, and flexible expansion for retrofits, schools, and small to mid-size commercial applications.

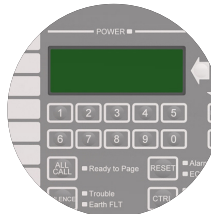

Text to speech:
Converts typed messages
into natural-sounding voices

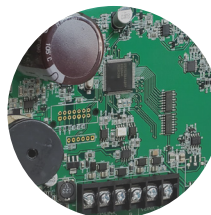

Key Features

Program every message and setting yourself, in the field—no factory configuration forms or chip swaps

4x20 LCD display with detailed zone-level status and trouble reporting

5070: 50W + 4 speaker circuits
10070: 100W + 8 speaker circuits
X70: Expandable up to 2,100W
