Graphic Touch Screen Annunciator

Introducing Potter's innovative Fire Alarm Graphic Touch Screen Annunciator (GTSA-7), designed to elevate safety and efficiency in fire detection systems. Packed with advanced features, the GTSA-7 is a significant advancement in the Potter product line. The integrated fire alarm touchscreen annunciator offers versatile control and is programmed using the same Potter Fire Panel Programmer software used on Potter fire alarm control panels. Featuring 1,000 programmable soft keys, the GTSA-7 enables efficient panel control. The feature set exceeds requirements for post-incident analysis. Flexible architecture allows direct connection to the panel or remote display options.

UL LISTED

NYC Fire Dept. Certificate of Approval
