

## Guardian Battery Backup Unit

Guardian BBU is an in-building power and battery backup solution for emergency response radio coverage systems. Designed and engineered to meet NFPA 1225 codes providing integrators and consultants with a BDA power and battery backup option.

### Key Features

- ✓ Flexible Power Options: Available in 10A or 20A models with support for sealed lead acid batteries

- ✓ UL 2524 Certified: Third edition UL 2524 certification ensures compliance with NFPA 1221/1225 codes and Authority Having Jurisdiction (AHJ) requirements

- ✓ Complete Potter Solution: Potter-branded battery backup unit designed specifically for Potter BDA systems, providing complete control over product quality and reliability
