

PotterNet-FOW Floor Overview Window

The PotterNet-FOW transforms how firefighters and emergency personnel view elevator lobby conditions in high-rise buildings. Replacing outdated LED annunciators, its 24-inch touchscreen delivers real-time, graphical insight into each monitored floor—offering faster situational awareness, cleaner installations, and simplified setup for contractors and ESD partners.

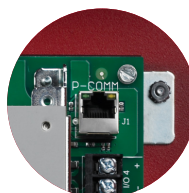

Key Features

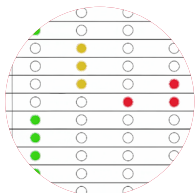

Modern Touchscreen Visibility /

24" capacitive display shows live status of smoke, heat, and power conditions—instantly translating complex data into clear, actionable visuals. Includes a built-in events lists and counters that provide detailed insights into system activity and historical status for faster, more informed response.

Faster Installation /

Single Ethernet connection replaces a maze of wires and external LED boards. Auto-generated graphics through PotterNet Studio mean setup in minutes, not weeks.

Smart Monitoring /

Displays per-floor smoke and heat detector status with configurable Normal, Monitor, and Unsafe thresholds (135–185 °F). Includes hoistway lighting control and power fault annunciation for elevator systems.

Configurable & Customizable /

Easily define floor names, quantity, and labeling through Potter's Fire Panel Programmer utility. Add your own logo as a scrolling screensaver and choose light or dark display modes.

Code-Aligned Design /

Meets IBC 2021 §403.6.1 requirements for elevator lobby smoke and temperature monitoring at the Fire Command Center—helping buildings stay compliant and ready for inspection.

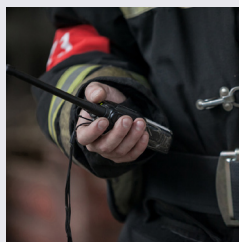

Why it Matters

For Potter Partners /

Faster installs, minimal programming, reduced onsite time

For Firefighters /

Immediate, floor-by-floor visibility of elevator power, smoke, and heat conditions

For Building Owners /

Code-aligned visibility that future-proofs compliance and simplifies service

Ordering Information:

Model	Description	Part #
POTTERNET-FOW	24" touch screen Floor Overview Window display & CPU. Surface mount red backbox included. Compatible with IPA, AFC, ARC-100 and PFC-4064 panels UL 864 Listed Software; BSIU hardware and a 1-year software service agreement (SSA) is included.	3995001
